DONTES-WARFARE

# MILITARY DECISION MAKING SUITE

# OVERVIEW

With this information system, various analyses can be carried out as part of military decision-making procedures, both in terms of simulating movement and simulating battles in a two-dimensional form (on a map). In addition to this system, 3-Dimensional training scenarios can also be visualized on a daily basis in order to provide more realistic and easier to evaluate visuals in this regard.

## FEATURES / FUNCTION

Analyze various aspects of military decision-making procedures and simulate them in your program

Create a 2-dimensional simulation of movement and battle (on the map) so that product corrections can be made if necessary as a result of the simulation

The visualization of 3 Dimensional scenarios on a daily basis helps facilitate the decision-making process of the military

Coordination between teams should be trained in a joint coordination setting
