INSTRUCTOR ROLE MANAGEMENT SUITE

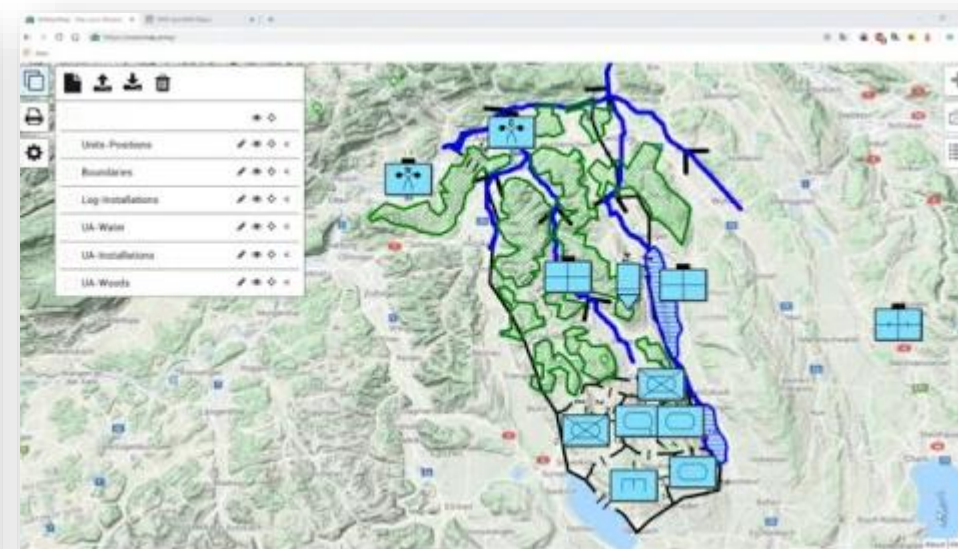

DXTATO-WARFARE

SUMMARY

As a result of this system, the assessor may be able to obtain a better understanding of the course of the simulation that the actors have performed. There are a number of basic parameters and data that are included in this system for conducting an assessment.

FEATURES / FUNCTION

- Analyze the course of the simulation carried out by the actors and perform an assessment of their performance
- Coordinate training between the various units of command
- In order to plan scenarios, it is necessary to have basic data available
