

LIBRERIA PORTALI

License Library Portal

Overview

A library management system that functions to regulate circulation, catalog and provide reporting features to display collection lists and book lending statistics, this system is also equipped with barcode printing facilities and can be integrated with other library systems.

Catalog module

Features to add, change and edit library collection data in accordance with standard bibliographic descriptions, support files in various monograph formats, serial publications, audio visuals, videos, e-books and so on. Management of collection items with many copies and different formats and there is also a feature to take an inventory of library collections

Circulation Module

Able to process borrowing and returning collections efficiently, effectively, and safely. Supports the reservation feature for collections that are being borrowed, including the reminder/notification. Support fine management feature. Equipped with flexibility for users to pay fines in installments. Supports the reminder feature for various purposes such as blacklisting problematic users or running out of membership. Supports the calendaring feature to be integrated with the calculation of the loan period, fines, and others.

Membership Management Module

Allows various types of users with various types of loan categories, various types of membership and the differentiation of each circulation service in the number of collections and the length of borrowing for the type of collection for each type/category.

Support for input using a barcode reader. It is possible to store user preference or subject interest information. It is possible to store additional information for reminder purposes at the time of transaction. Allows storing detailed user information that is more complete. Minimum member information search based on member number and name. Making a member card equipped with a barcode for loan transactions.

Collection Inventory Module

Includes reporting for all modules available in the application, including:

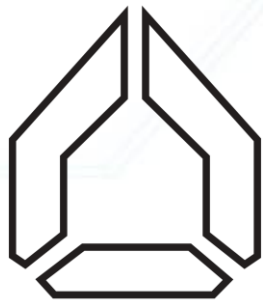

- Title Report.
- Report Items/ Coffee collection.
- Membership Report.
- Reports on the number of collections by classification.
- Delay Report.
- Various kinds of statistics such as collection statistics, borrowing, membership, collection usability.
- The report display has been designed to be printer-friendly, making it easier to print.
- Complete data filters for each report.
- A relatively easy to learn reporting API for creating new custom reports.

Serial Publishing Module

- Subscription data management.
- Kardex data management.
- Management of tracking data for upcoming and existing publications
- Allows tracking data for serials with irregular publication schedules
