Circulation

Able to process borrowing and returning collections efficiently, effectively, and safely. Supports the reservation feature for collections that are being borrowed, including the reminder/notification. Support fine management feature. Equipped with flexibility for users to pay fines in installments. Supports the reminder feature for various purposes such as blacklisting problematic users or running out of membership. Supports the calendaring feature to be integrated with the calculation of the loan period, fines, and others.

Technical Specifications

- Able to manage bibliographic data efficiently to minimize data redundancy
- Masterfile management for referential data
- Recording of borrowing transactions and returning books
- Arrangement of borrowing collections by type of member
- Member data management
- Inventory of library collections
- Reports and statistics
