Toratumaticia

Gate Software

OVERVIEW

Dashboard & Reporting

Database Apps Library
Management System

RFID Gate

- RFID Reader Setup
- Alarm Setup
- Sound Setup
- Timer Setup
- Counter In and Out

Technical Specifications

- Able to read RFID books

- Integrating Gate control into the application server

- Save book anomaly data that goes through the gate to the database server

- Integrated with Other RFID systems in the Library

RFID Reader Setup

Determine the number that will be read by the Gantry where this number will be an alarm indicator and the warning light is on

Alarm Setup

Determine the alarm indicator and determine the duration of the alarm that will light up when there is an indicator on the gate that reads according to what has been determined

Sound Setup

Determine the sound that will come out when there is an indicator that is read according to what has been determined

Timer Setup

Determine the duration of the alarm when it sounds and also determine the duration of the light when it is on.

Counter In & Out

The system will count and display the number of guests entering and leaving the library

GATE SOFTWARE

- Able to read RFID books

- Integrate Gate control into application servers

- Save book anomaly data that goes through the gate to the database server

- Integrated with Other RFID systems in the Library

- Alarm Feature Security features to prevent the theft of books
