

Electronic Guest Management System

APPLICATION FEATURES

Self Check In

Ready to streamline your building's check-in process with Singu Guestbook, the practical automated front desk system for modern building management? Self check-in features speed up the guest registration process making your guests feel welcome, without you employing more staff.

Touchless Check-In

Using their mobile device, visitors provide all the information needed to complete check-in. No logbooks, touchscreens, or superfluous contact with staff — a quicker, more efficient, and safer way to handle reception, especially during a pandemic.

Technical Specifications

- Able to read visitor's RFID
- Filling data with keyboard/Screen keyboard
- Data saved to database server
- Feedback in the form of announcements / messages from the Library
- Recognition of visitors and greetings with RFID building
- Integrated with Other RFID systems in the Library

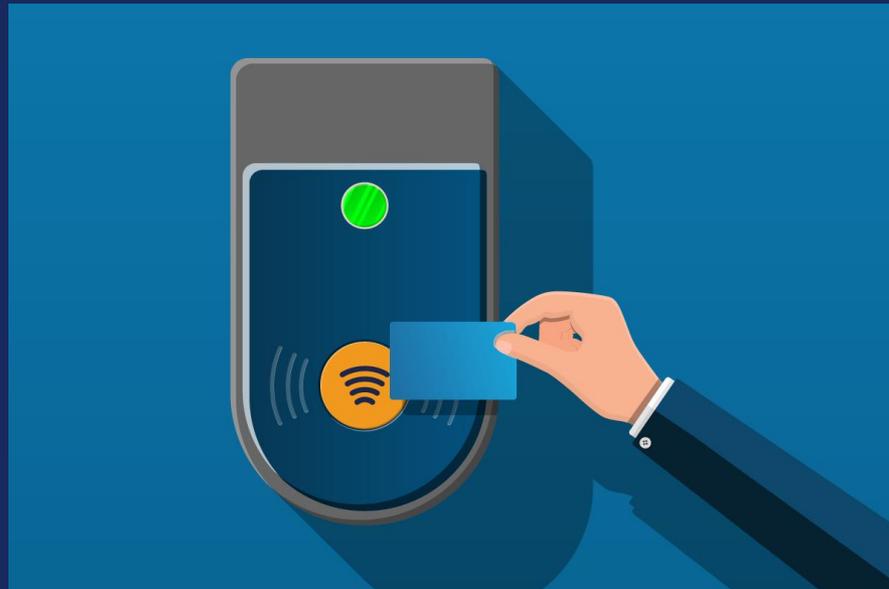

Electronic Guestbook Software

Self Check In
